

Pellets by Stora Enso

Environmentally sound heating

Like a warm hug for your home

Why buy wood pellets for heating?

There are three great reasons to buy wood pellets if you're considering sustainable heating: economy, efficiency and the environment.

You can buy our pellets any time of the year and easily store them thanks to their compact nature. Compared with firewood, wood pellets are easier to store and burn more efficiently.

Save on heating bills, help save the environment

Because they are a dense form of fuel with a high energy content, our wood pellets burn efficiently. In fact, biomass wood pellets can cost you up to 25-50% less on average than fossil heating fuels.

Fossil heating fuels like oil or propane gas are often expensive and unstable in price. They also pose a threat to the environment and the global climate.

The wood from our pellets is carbon neutral – and it is coming from sustainably managed forests. We use natural forestry by-products from our own production only. Production is directly integrated after the sawing line to reduce unnecessary transportation.

It's easy to buy wood pellets from Stora Enso

We source it, we make it, and we deliver it. From forest to furnace, we deliver our premium wood pellets free to your home. Visit our online webshop at www.storaenso.com/pellets for a quick, easy and responsible way to heat your home without overheating the planet.

5 key benefits

- **Reduces environmental impact** – a clean-burning renewable fuel source, FSC® and PEFC™ certified for responsible forestry practices
- **Cost efficient** – costs much less on average than fossil heating fuels and is more price-stable
- **Energy rich** – with its high energy content and density, it burns more efficiently than traditional firewood
- **Easy online ordering** from the comfort of your own home (see delivery destinations) and superior customer service and delivery reliability
- **Convenient to use** – can be bought in bulk or bags and stored in less space than other biomass fuels

For the love of your horse

Super absorbent, hygienic and comfy

Stora Enso's premium horse bedding pellets are made from locally sourced and sustainably managed wood. Our horse bedding pellets quickly absorb liquid and moisture, transforming into a bed that is fluffy, soft and comfy underfoot. Additionally, our pellets contain natural resins and oils to combat ammonia, keeping your stable smelling sweet.

Pellets are heat-treated and therefore naturally antiseptic and free from mould and bacteria. They are a safe choice and provide a healthy hoof and limb environment for all ponies and horses. The virtually dust-free pellet bedding can also benefit horses prone to respiratory conditions.

Cuts mucking out time in half or more

You'll be amazed at how much time you save on mucking out with wood pellet horse bedding. Unlike other bedding materials, this super-absorbent and long-lasting bedding results in fewer muck heaps and less bedding you need to remove. So, you can spend less time cleaning and slash your waste volumes.

Saves storage space

Thanks to the tightly compacted nature of wood pellets, the bags take up minimal space compared with other alternatives. You simply add warm water to them and they expand to nearly 4 times their original volume.

5 key benefits

- **Significantly more absorbent** than most other types of horse bedding – keeps stables dry and hygienic. Drastically reduces mucking out time – this material is labour- and time-saving
- **Cost efficient** – long-lasting absorbent product means you replace it more rarely
- **Naturally soft**, fluffy and comfortable bed
- **Premium horse bedding** – made from top-quality natural raw materials, sustainable and biodegradable
- **Easy storage** – compacted pellets are heavier and denser than straw or shavings and take up less storage space
